Project V: Advanced Software Development Tools

Software Release Note

Purpose

The purpose of this document is to provide release information about your service in the Enterprise Software for the rest of the class.

What to do

Service Name: Attendance & Participat

Github Branch Repo TAG: Arda190777/C3L - detail

List of Issues Fixed – In the text box below, provide a list of all issues that have been fixed in this release of your source code. Make sure you reference Github Issue Numbers for traceability.

```
MODULE 10 - SPRINT 1 RELEASE CANDIDATE | October 16, 2026
Repo: https://github.com/Arda190777/C3L
Branch: feature/attendance-sprint-1
Tag: module10-sprint1-v0.1.0-rc.1

Implemented in this tested candidate:
#1 - Record/correct daily attendance; local persistence; absence
#2 - Attendance history with course/student/date filters and empt
#3 - Validate input, escape HTML, bind SQL parameters and repo

These are new features/enhancements to the starter, not invente
until the internal team PR is reviewed and merged. No class-repo
```

List of Known Issues – In the text box below, provide a list of all known issues that you are aware of and currently working on. Make sure you reference Github Issue Numbers for traceability.

```
#4 - Real peer review, class collaborative SRS mapping/update a
Documents and test evidence are prepared; the shared SRS link

#5 - No login/role enforcement or enrollment checks. Only use fi
history/API can read all matching local marks.

#6 - Participation tracking, attendance reports and attendance st
1.

Other limits: one mark per student/course/day; corrections overw
log or multiple sessions. Local SQLite is not shared multi-server

Issues: https://github.com/Arda190777/C3L/issues - numbers abo
```

New Functionality – Each design sprint requires a new set of functionalities to be implemented and tested prior to integration. In the text box below, provide a list of the new requirements that have been implemented and any operational instructions needed to operate or use the new feature(s). [I.e. small quick start users manual type information]

IMPLEMENTED REQUIREMENTS
M10-FR-01: Record attendance and correct the same daily mark -
M10-FR-02: Read and filter attendance history - #2.
M10-FR-03: Distinguish present, excused and unexcused - #1, #3
These IDs are local proposals because the supplied brief has no
SRS mapping remains pending - #4.

QUICK START
1. Clone the team repository https://github.com/Arda190777/C3L
feature/attendance-sprint-1 - or the candidate tag.
2. From the repo root run: bun install --frozen-lockfile
3. Run: bun run dev
4. Open http://localhost:3000/10-attendance or select Module 10
5. Enter sample course PROG3000, student S1001 and date 2026
add a note, then Save attendance.
6. The history page opens with a saved message and the matchin
7. To correct it, open Record attendance and save the SAME IDs/
- unexcused. The existing row is updated rather than duplicated.
8. On Attendance history, enter optional course/student IDs and
exactly and dates include both endpoints. Clear filters to view al
9. Restart the server to confirm stored marks remain. Data is loc
src/modules/10-attendance/data/attendance.sqlite - git-ignored.

JSON API
POST /10-attendance/api/attendance accepts JSON strings cours
optional notes. Success: 200 with record. GET the same path wit
query parameters; success: 200 with records array.
Status values: present, excused, unexcused.
Invalid fields/dates: 422. Storage failure: 503. The HTML save re

VALIDATION / LIMITS
IDs are trimmed, 1-50 characters. Date is a real YYYY-MM-DD da
characters. One mark per student/course/day. Use sample data o

BUILD / DESIGN
Module code and tests are JavaScript. The shared host remains T
Elysia and Bun native SQLite are used without adding packages o
doxygen src/modules/10-attendance/Doxyfile to rebuild the HTML

NEXT STEPS
Finish actual teammate review, shared SRS update and demo bef
reports and statistics stay in #6.

Record of Regression Testing – In the textbox below, list all the test cases you performed during this Design Sprint. If the test cases failed, provide your Github task tracking number with a short description of the failure. You must show poof of your testing and traceability quality.

EXECUTION: October 16, 2026 | Windows | Bun 1.4.3
Behavior tested at code commit e04b171; later source edits are do
Module: 25 passed, 0 failed, 88 assertions.
Full bun run check: PASS; 81 tests passed, 0 failed; all 12 module
Includes lint and the existing TypeScript host check. JS behavior u

TEST CASES - all PASS; issue traceability in docs/testing.md
VAL-01: three valid statuses - #1/#3.
VAL-02: blank/oversized IDs rejected - #3.
VAL-03: invalid dates rejected; leap day accepted - #3.
VAL-04: invalid status and long notes rejected - #3.
VAL-05: filter date/order/ID validation - #2/#3.
DB-01: empty database history - #2.
DB-02: trimmed IDs/notes and timestamp - #1.
DB-03: same-key correction, no duplicate - #1.
DB-04: separate students/courses/dates, sorting - #1/#2.
DB-05: exact IDs and inclusive date filtering - #2.
DB-06: SQL-looking IDs remain data - #3.
DB-07: invalid store input rejected - #3.
DB-08: file persistence after close/reopen - #1.
HTTP-01: shared prefix and HTML wrapper - #4.
HTTP-02: JSON save/read all statuses - #1.
HTTP-03: malformed/missing/wrong-type data - #3.
HTTP-04: invalid fields return 422 without write - #3.
HTTP-05: form save, 303 and filtered history - #1/#2.
HTTP-06: escaped retained form values and errors - #3.
HTTP-07: stored values escaped in HTML - #3.
HTTP-08: invalid history ranges rejected - #2/#3.
HTTP-09: filters and empty state - #2.
HTTP-10: API correction without duplicate - #1.
HTTP-11: storage failure gives friendly 503 - #3.
APP-01: real module discovery, HTML and 404 - #4.

BROWSER: save, correction, empty result, reversed dates and 375
outputs are in docs/evidence/. These are tool-run checks, not a cl

The first restricted sandbox run blocked unrelated network/temp-fi
passed with normal permissions. One early missing-await test erro
tracks review/SRS/demo, #5/#6 track known unfinished scope.

Rubric
